

I am writing in regards to AIR 1 radio station. I strongly oppose the possibility of AIR 1 being replaced by an LPFM providing other broadcasting. It is very important to have AIR 1 remain on air AS IS. There are too few family friendly, positive messages out there. There are however, too many radio broadcasts playing other kinds of music and talk radio. This is the only station we have in our community for everyone, especially teenagers, to listen to with a positive message. It is so important they continue to have this option. The media continues to get worse and worse, PLEASE do not take this away. It is fully supported by listeners because we want it. Young people need this kind of message. Our community needs this kind of message. PLEASE reconsider your proposal to give priority to LPFM over FM translator service.
